

VIGIL quotation - L&T

Date - 14/07/2026

Number of cameras

100

Scope of deployment

Number of cameras covered: 100

Use case: Safety compliance monitoring

Detections included: PPE Detections, restricted-zone intrusion, Fire safety, etc. (more details in deck of Autonex AI)

Alert channels included: Dashboard + on-ground speaker alerts + email alerts

Evidence storage: 30 days image-based audit trail

Deployment model: Edge AI processor at site + cloud dashboard

Existing CCTV/NVR feed to be used, subject to RTSP/IP camera compatibility

Sr. No.	Type of cost	Services included	QTY	Amount per cam	Discount	Final price	Total
1	One time installation	- AI processor (Autonex x NVIDIA) - On ground alert speakers (1 per camera) - Webapp dashboard for alerts (run on cloud) - One time system integration on-site and visit for consultation	100	100,000	40%	60,000	6,000,000
2	Recurring Platform and Support (1st year)	- Cloud dashboard access - Violation registry and audit logs - 30-day image evidence storage - Email alerts for violations - Software updates and dashboard upgrades - Remote support and issue resolution - Model tuning for existing agreed detections	100	30,000	100%	0	0
3	Recurring Platform and Support (2nd year onwards)	- Cloud dashboard access - Violation registry and audit logs - 30-day image evidence storage - Email alerts for violations - Software updates and dashboard upgrades - Remote support and issue resolution - Model tuning for existing agreed detections	100	30,000	20%	24,000	2,400,000

Client-side requirements:

Existing CCTV/NVR should support RTSP/IP feed access

Client to provide power, network access, mounting permissions, and site access

Internet connectivity required for cloud dashboard and remote support (100mbps dedicated line)

Camera quality, lighting, angle, and field of view should be suitable for AI detection

Electrical/civil/cabling work, if required, will be charged separately

Payment terms:

10% advance payment

Remaining payment: within 15 days of delivery of materials

Exclusions

New CCTV cameras, NVR, PoE switches, cabling, poles, mounts, and civil/electrical work unless explicitly mentioned.

WhatsApp/SMS charges, if required, charged at actuals or separately.

New AI detections beyond agreed scope.

ERP/SAP/third-party system integrations.

Hardware damage due to power surge, water ingress, mishandling, theft, or site conditions.

Delivery timeline: 3-4 weeks after PO is raised (depending on import conditions of semiconductor chips)

Warranty & support

Hardware warranty: 12 months, subject to manufacturer terms.

Remote software support included during subscription period.

On-site support visits after go-live, if required, will be charged separately.

First 2-4 weeks after go-live treated as stabilisation/tuning period.

Data storage terms:

Only violation images and metadata are stored; continuous video storage is not included.

Standard retention: 30 days.

Longer storage can be enabled at additional cost.

Evidence includes image, timestamp, camera/location, violation type, and severity.

Quotation validity

Quote valid for 15 days / 30 days

Prices are exclusive of GST

Final commercial value subject to site survey and camera-feed validation
